- MOLE: MILY VACCILLE AUI
- Polio: A minimum of 4 weeks between doses required with 6 months between last 2 doses.
- MMR: Required second dose should be given on/after 4th birthday. However, dose 2 may be given earlier with at least 4 weeks between 1x & 2th doses. Hib: If series started <12 months of age, 3 doses required with at least 1 dose on/after 1st birthday. Two doses required if 1st dose received at 12-14 months. 1 dose of Hib vaccine administered between 16 months and 59 months is sufficient.
- Hep B: 2<sup>rd</sup> dose a minimum of 4 wks after dose 1; 3<sup>rd</sup> dose at least 16 wks after dose 1 and at least 8 wks after dose 2. For infants currently receiving primary doses, final dose should be administered no earlier than age 24 weeks. No doses required ≥ 60 months of age
- Varicella: For children aged 12 months-12 years, the minimum interval between the two doses is 3 months. However, if dose 2 was administered > 28 days after dose 1, dose 2 is considered valid and need not be repeated. For persons PCV: Administer a series of PCV13 vaccine at ages 2, 4, 6 months with a booster at age 12-15 months. Catch-up: Administer 1 dose of PCV13 to all healthy children aged 12 through 59 months who are not completely vaccinated for their age.
- Tetanus/Diptheria/Pertussis: All students 7th-12h grades require proof of 1 dose Tdap received. 1 dose of Tdap required regardless of when the last Td containing vaccine was given. Children 7-18 years who are not Diphtheria/Tetanus/Pertussis: A 3-dose series is sufficient if initiated after 7 years of age in which 1 dose must be Tdap, preferably the first, followed by 2 doses of Td. Hep A: One dose required by 15 months, two doses recommended with at least 6 months between doses. Hepatitis A vaccine is only required for childcare and pre-school age children. aged >13 years, the recommended minimum interval is 4 wks. Required for proof of varicella immunity; Receipt of vaccine, physician/health care provider diagnosis of varicella or laboratory evidence of immunity; fully immunized with the childhood DTaP series should be vaccinated according to the catch-up schedule, with Tdap preferred as the first dose followed by Td if needed.
